Location Hangzhou, Zhejiang, China

corporate

Company Offctrl (offctrl.ai)

Title Founder & CEO

Address Hangzhou, Zhejiang, China

professional experience

Founder & CEO

Apr 2026 – Present

Offctrl, Hangzhou, China · On-site

Founded and lead Offctrl, an attack-defense hackathon team building the “OpenControl” brand. Drive product prototyping, engineering, and team strategy across AI and Web3; shipped award-winning prototypes at multiple 2026 hackathons, including Offctrl.ai (Twitter growth tooling) and Hacker News Radar (GBA-style daily HN digest, Most Practical Award, \$1,000).

Web3 & Cryptography Contractor

Jul 2025 – Dec 2025

Private Clientele, Remote

- RUST-SEC data engineering for a mathematics & computer science research project (New York University): designed a workflow that batch-processed thousands of vulnerability reports, reducing reproduction from ~2 hours per report to pipeline scale.
- Developed Web3 sniper bots for on-chain trading scenarios.
- Served as low-level architect for a NockChain mining operation: architected a self-operated pool for a client seeking independence from the official pool (~1,100 AMD GPUs, ≈4.3 PFLOPS).

Career Break — Travel & Independent Projects

May 2024 – Apr 2026

Remote / Everywhere

Traveled extensively while pursuing independent work and study in Web3, cryptography, Rust, and AI; began competitive hackathon participation.

Software Engineer

Apr 2020 – Mar 2024

Porsche AG · Contract, Hangzhou, China

Four-year contract software engineering engagement within Porsche AG. Professional background bridging software engineering with automotive and finance domains.

Financial Specialist

Apr 2018 – Mar 2020

Porsche AG · Contract, Hangzhou, China

Contract finance role; domain foundation later applied to fintech/AI prototypes (e.g., Auren, an AI platform for investment teams and enterprise finance).

Student Intern

Sep 2017 – Dec 2017

AUDI AG · Internship, Hangzhou, China
Student internship with AUDI AG.

education

Hangzhou Dianzi University

Sep 2014 – Jun 2018

B.Sc. Computer Science & B.Eng. Vehicle Engineering (dual degrees)

open source & selected projects

uniswap-v4-core

2025

Rust · 13★

Independent Rust implementation of the core contracts of Uniswap v4.

evaopt

2025

Rust + Python · 6★

Localized large-model optimization engine.

single0.com

2026

Personal bilingual site — hackathon record, pitches, and “Hackathon Breaker” sharing

offctrl-ai

2026

Attack-defense hackathon team homepage, OpenControl brand

Open-source engagement

2025

Issues/PRs to rust-secp256k1 (public-key generation optimization), genact (adopted suggestion), stellar-cli (HTTP client optimization), plus forks of Groth16, arkworks algebra, Solana anchor, DataFusion, and NockChain.

hackathon record

Round 8 — Shenzhen (upcoming)

Sep 2026

Seat booked; theme TBA

GenAI Fund Hackathon — Ho Chi Minh City (AWS HQ)

Jul 2026

Offctrl.ai × GoGlobal · ≈\$5,000 in credits

Rebuilt the front end with vm0 and integrated the GoGlobal API for a 13-track, \$1M prize-pool hackathon.

MBTI Hackathon — Shanghai (Infinite Science)

Jul 2026

Track Grand Prize + extra award · \$750

Net-Café Hackathon — Hangzhou (Pipimao)

Jun 2026

Lost by 4 votes

Net-Café Hackathon — Beijing (Wangjing)

May 2026

Ghibli × Zuma game · Sony WH-1000XM6 (≈\$400)

First discovery of vm0; used it to build a blog (unplaced). Co-built the Ghibli × Zuma crossover game that won.

Hackathon — Shanghai (Changzhi Rd 505) Hacker News Radar · Most Practical Award · \$1,000 GBA-style daily Hacker News digest that predicts next-week/month hot topics.	May 2026
---	----------
